# NORTH AMERICAN SARRACENIA CONSERVANCY GROWER INFORMATION SHEET AND AGREEMENT

Hello prospective NASC grower!

In order to be considered for North American *Sarracenia* Conservancy (NASC) Grower's Committee and to maximize the success rate and further the goals of the NASC, it is required that each potential grower read the attached Grower's Agreement document and complete the Grower Information Sheet in its entirety. This document should be returned to Victor Holland, NASC Administrator of Plant Materials. The completed form may be e-mailed to <a href="mailto:distribution@nasarracenia.org">distribution@nasarracenia.org</a> or signed and mailed to:

Victor Holland 2125 Bordeaux Dr. Mebane, NC 27302

Information provided will not be shared with anyone other than the NASC elected board members. This information is needed to ensure the survival, propagation, and security of the NASC plants that will be grown by you.

Thank you for volunteering your time as a grower for the North American *Sarracenia* Conservancy. We look forward to working with you!

Thank you, Victor Holland NASC Administrator of Plant Materials

# NORTH AMERICAN SARRACENIA CONSERVANCY GROWERS AGREEMENT

- **I. GOALS -** The goals of the North American *Sarracenia* Conservancy (NASC) Grower's Committee are to propagate collected plant materials, including seeds, for the purposes of reintroduction and maintaining a permanent record of the genetic diversity of the genus *Sarracenia* and companion plants.
- **II. GUIDELINES** We ask that all potential growers follow a basic set of guidelines for growing all plants that have been rescued by, donated to, or grown by the NASC.

## III. REQUIREMENTS -

## 1. To become a grower you must

- a. Be a NASC member in good standing and at least 18 years of age.
- b. Verify a minimum of three years of experience growing Sarracenia.
- c. Verify that you have successfully stratified, germinated, and grown *Sarracenia* from seed to adult flowering plants.
- d. Must provide proper growing conditions for the size of plants you receive (i.e. seedlings, yearlings, and/or mature plants) to achieve healthy plants. The <u>NASC propagation and cultivation guides</u> should be referred to for general plant care.
- 2. All plant material provided to NASC growers or members by the NASC and/or its titles including plant propagules, seed, and rhizome cuttings and divisions are considered the property of the NASC, and may not be sold, traded, used for personal purposes or otherwise removed from NASC jurisdiction without the authorization and express written permission of the NASC Board.
- 3. All growers must adhere to NASC plant codes and growing procedures.

#### 4. Plant labeling requirements

a. NASC plants must be clearly and permanently labeled with at least two plant tags placed into the pot. A NASC logo plant tag should be in each pot at all times with accurate, clear and updated information. NASC logo plant tags will be provided by one of the Head Growers.

## 5. Record Keeping

a. All NASC plants with separate codes/descriptions shall be maintained on a separate Grower Form. This form is available online at <a href="http://www.nasarracenia.org/nasc/forms/NASCGrowoutRecord.rtf">http://www.nasarracenia.org/nasc/forms/NASCGrowoutRecord.rtf</a>

- b. Information will be recorded on each form whenever seeds/plants are stratified, sowed, upsized, flowering, pollinated, produce seeds, or shipped to another NASC grower including what month of the year it was shipped. One annual count of the number of plants and growth points should be completed and one photograph of the plant(s) per code should be provided. This information will be provided to the NASC Administrator of Plant Materials or Head Grower on an annual basis beginning when you receive your plants and once every year by the December 31 deadline to ensure NASC has an accurate record of plant property. These forms may be requested by the Head Grower at any time or you can use the online census survey. If this is not completed your status as a grower may be canceled or you may lose membership privileges.
- c. When growers obtain more than three adult plants of the same code; attempts should be made to distribute plants of this code to other growers.
- d. When feasible, a minimum of five seedlings will be distributed to each grower to mitigate potential loss.
- e. Plant material other than seeds can only be shipped in winter or spring months to help ensure plant health.

#### 6. NASC Codes

- a. Only NASC plants grown from seed from known specific locations, or plants for which the <u>original collector</u> can verify specific location data, shall be candidates for reintroduction.
- b. Plants without known location data, including all hybrids from cultivation, can be registered/assigned a NASC code. These plants are ineligible for reintroduction purposes.
- c. Only the NASC President and Administrator of Plant Materials are to maintain specific GPS coordinates of plant site codes.

ANY CHANGES TO THE GUIDELINES MUST BE MADE BY A MAJORITY VOTE OF THE GROWERS COMMITTEE AND MUST BE APPROVED BY THE EXECUTIVE BOARD OF THE NORTH AMERICAN SARRACENIA CONSERVANCY

The NASC Grower Agreement is current as amended by the Board on 15 December 2011.
